ATTORNEYS FOR DEFENDANT
LESSEREVIL LLC

**UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF CALIFORNIA**

TWYLA COGSWELL, individually, and on
behalf of those similarly situated,

Plaintiff,

v.

LESSEREVIL LLC,

Defendant.

Case No. 1:23-CV-00311-ADA-BAM

**DEFENDANT LESSEREVIL LLC'S
NOTICE OF MOTION AND MOTION
TO DISMISS; MEMORANDUM OF
AUTHORITIES IN SUPPORT
THEREOF**

Date: June 5, 2023
Time: 1:30pm
Judge: Hon. Ana de Alba
Courtroom: 1

Complaint Filed: March 1, 2023

NOTICE OF MOTION AND MOTION

TO ALL PARTIES AND THEIR ATTORNEYS OF RECORD:

PLEASE TAKE NOTICE that on June 5, 2023 in Courtroom 1 of the above-entitled Court, Defendant LesserEvil LLC (“LesserEvil”) will and hereby does move for an order dismissing the claims asserted by Plaintiff Twyla Cogswell.

The motion is based upon this Notice of Motion, the accompanying Memorandum of Points and Authorities in support of the Motion, the Declaration of David H. Kwasniewski, and the files and records in this action and any further evidence and argument that the Court may consider.

Dated: April 28, 2023

Respectfully submitted,

BRAUNHAGEY & BORDEN LLP

1 Defendant LesserEvil LLC respectfully submits this Memorandum in support of its Motion
2 to Dismiss.

3 INTRODUCTION

4 LesserEvil sells organic, sustainable, and delicious snacks. Plaintiff has sued LesserEvil for
5 false advertising without identifying any statement that is false. Plaintiff claims that she bought two
6 types of popcorn and one type of puffs because she read language on the back of the packages
7 including “healthier,” “Good Source of Fiber,” “40% Less Fat,” “33% More Fiber,” “20% Fewer
8 Calories,” or “Nutrient Dense,” and that these words made her believe that the snacks contained less
9 than 3 grams of saturated fat per serving. Her claims lack merit and should be dismissed without
10 leave to amend.

11 LesserEvil accurately includes the saturated fat content in the Nutrition Facts, which can be
12 found on the same panel immediately below, and right next to the language Plaintiff claims caused
13 her purchases. To the extent that Plaintiff really cared about saturated fat content, it is not plausible
14 that she studiously ignored the best source of this information (the Nutrition Facts) to cobble
15 together an unreasonable belief based on a hodgepodge of language from other places on the label.

16 Even if these phrases were Plaintiff’s only referent for saturated fat content, they are not
17 false. The language “33% More Fiber,” “20% Fewer Calories,” and “40% Less Fat,” accurately
18 compares the popcorn to “typical oil popped popcorn containing 10G fat, 3G fiber, and 150 calories
19 per serving.” (Compl. ¶ 5.) The other claims are non-actionable puffery because they have no
20 objective meaning. *See, e.g., Newcal Indus., Inc. v. Ikon Office Solution*, 513 F.3d 1038, 1052-53
21 (9th Cir. 2008) (ads that defendants “would deliver ‘flexibility’ in their ‘cost-per-copy’ contracts”
22 and “that they would lower copying costs for consumers” were puffery because they were not
23 quantifiable). Statements such as “healthier” cannot be tested because there is no comparator or
24 rubric. It is unclear how any of the statements at issue could plausibly cause Plaintiff to form a
25 belief about the saturated fat per serving. LesserEvil provided Plaintiff with truthful information
26 about the saturated fat content. She was free to use, or ignore, it as she saw fit.

27 Courts have begun to reject Plaintiff’s theory that someone can be tricked about the
28 “healthiness” of a product when the label truthfully discloses the nutritional facts. In *Clark v.*

1 *Perfect Bar, LLC*, the Court dismissed plaintiffs’ claims that they were misled into thinking that a
 2 protein bar was “healthy,” when it supposedly contained “excessive sugar.” 2018 WL 7048788, at
 3 *1 (N.D. Cal. Dec. 21, 2018). The Court reasoned that plaintiffs could simply look at the
 4 ingredients to “decide for themselves how healthy or not the sugar content would be” and that they
 5 could not have “reasonably overestimate[d] the health benefits of the bar merely because the
 6 packaging elsewhere refers to it as a health bar.” *Id.* Because “the honey/sugar content was properly
 7 disclosed—that is the end of it—period.” *Id.*

8 Similarly, in *Truxel v. General Mills Sales, Inc.*, the Court rejected plaintiffs’ contention that
 9 sugar in cereals rendered health and wellness claims misleading because “the actual ingredients
 10 were fully disclosed and it was up to the Plaintiffs, as reasonable consumers, to come to their own
 11 conclusions about whether or not the sugar content was healthy for them.” 2019 WL 3940956, at *4
 12 (N.D. Cal. Aug. 13, 2019). In *Silver v. BA Sports Nutrition*, 2020 WL 2992873, at *7 (N.D. Cal.
 13 June 4, 2020), the Court dismissed claims that a sports beverage could mislead consumers about the
 14 sugar content, which was accurately stated in the Nutrition Facts. These decisions, and many others,
 15 recognize that allowing such claims would subject companies to protean labeling requirements that
 16 change based on plaintiffs’ lawyers’ shifting contentions about what they consider healthy. The
 17 same analysis is dispositive here.

18 All the claims are separately barred by the First Amendment, which precludes using the U.S.
 19 Courts to restrain truthful speech. Plaintiff cannot identify any government interest to support her
 20 proposed content-based restriction on speech, which cannot survive strict scrutiny.

21 Plaintiff’s other claims fail. LesserEvil did not commit a technical FDA labeling violation;
 22 Plaintiff selectively reads only portions of 21 C.F.R. § 101.13(h) and 21 C.F.R. § 101.65(d)(2)(i)(F)
 23 instead of the entire regulation. Finally, Plaintiff’s assortment of parasitic state-law theories fails for
 24 the reasons given above.

25 **BACKGROUND**

26 **A. The Parties**

27 Defendant LesserEvil was founded in 2005 by Charles Coristine, who left the world of
 28 finance to pursue a more holistic lifestyle of meditation and self-awareness. The company offers

organic, clean, tasty and sustainable snacks that are a “better alternative to the big name snacks,” while protecting the welfare of its employees. LesserEvil was recognized in 2020 as Whole Foods Market’s National Award Recipient for Raising the Bar for Quality.¹

Plaintiff Twyla Cogswell claims she purchased Himalayan Pink Salt Popcorn, Himalayan Gold Popcorn, and No Cheese Cheesiness Paleo Puffs because these products had the language “healthier,” “Good Source of Fiber,” “40% Less Fat,” “33% More Fiber,” “20% Fewer Calories,” and “Nutrient Dense” on the label. (Compl. ¶¶ 15-17.)

B. Plaintiff’s Claims

The back panel of the label of one accused bag of popcorn (Compl. ¶ 25) is shown below:

¹ <https://www.fooddiver.com/press-release/20200309-lesserevil-receives-top-honor-for-quality-at-whole-foods-market-2020-suppli/>

The back panel of one accused bag of puffs (*id.*) is shown below:

Plaintiff claims that LesserEvil engaged in “false advertising,” and purports to assert claims under the Unfair Competition Law (“UCL”) and False Advertising Law (“FAL”), Cal. Business & Professions Code §§ 17200 et seq., §§ 17500 et seq., the Consumer Legal Remedies Act (“CLRA”), Cal. Civ. Code §§ 1750 et seq., “unjust enrichment” and “state consumer protection statutes.” The complaint alleges that Plaintiff bought the accused popcorn because the words “healthier,” “Good Source of Fiber,” “40% Less Fat,” “33% More Fiber,” “20% Fewer Calories,” and “Nutrient Dense” caused her to buy the popcorn. As seen in the complaint at paragraph 25 and the associated images, the language that supposedly caused Plaintiff to buy the popcorn (pointed out by the red arrows above) appears on the back of the package, next to the Nutrition Facts—which are called out in large, bold letters—and the word “nutrient dense” does not appear on the popcorn.

The term “nutrient dense” is on the Paleo Puffs Plaintiff claims to have purchased. (Compl. ¶ 25.) However, the terms “Good Source of Fiber,” “40% Less Fat,” “33% More Fiber,” “20% Fewer Calories,” which supposedly caused her to buy the popcorn, do not appear on this label.

ARGUMENT

A complaint must be dismissed unless it has sufficient “factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.” *Hartmann v. Cal. Dept. of Corrections*, 707 F. 3d 1114, 1122 (9th Cir. 2013) (quoting *Ashcroft v. Iqbal*, 556 U.S. 662, 678 (2009)). A court should not assume that plaintiff “can prove facts which it has not alleged or that the defendants have violated the ... laws in ways that have not been alleged.” *Hawkings v. Sacramento Cnty. Dep’t of Child & Fam. Adult Servs.*, No. 2:20-cv-0156 DAD DB PS, 2023 WL 316569, at *2 (E.D. Cal. Jan. 19, 2023) (citing *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters*, 459 U.S. 519, 526 (1983)).

I. PLAINTIFF’S CLAIMS ARE IMPLAUSIBLE

Plaintiff’s claims are implausible for at least three separate reasons. First, she asserts that she selectively read the label to conclude from language other than the most obvious source of the saturated fat content (the Nutrition Facts) that the snacks she was purchasing had less than 3 grams of saturated fat per package. This makes no sense, especially given that the language she claims to have relied upon has nothing to do with saturated fat. Second, the language Plaintiff claims to have relied upon was paradigmatic puffery—complimentary statements about the product that cannot be proven true or false. Third, Plaintiff’s attempt to aggregate truthful statements into a supposedly misleading one fails as a matter of law.

A. It Is Not Plausible That Plaintiff Selectively Read the Label So as to Miss the Portion Most Significant to Her: The Nutrition Facts

LesserEvil labels properly and accurately disclose all FDA required information about fat content in the location where LesserEvil is legally obligated to provide it, and consumers expect to find it, the Nutrition Facts panel. If Plaintiff cared about saturated fat to the point that it drove her snack-purchasing decisions, it is implausible that she would read the romance language right next to the Nutrition Facts and look at icons appearing right above the Nutrition Facts to figure out how

1 much saturated fat was in the product, while studiously ignoring the most obvious source of this
 2 information—the Nutrition Facts.

3 Courts have dismissed claims in similar situations. *See, e.g., In re 5-Hour Energy Mktg. and*
 4 *Sales Practices Litig.*, No. ML-13-2438 PSG (PLAx), 2018 WL 11354864, at *5 (C.D. Cal. Jan. 24,
 5 2018) (“the Court agrees with Defendants’ observation that ‘[a]ny consumer who is interested in the
 6 number of calories in a bottle of 5-hour ENERGY® knows immediately that’ it contains four
 7 calories, and ‘therefore cannot be misled by solely focusing on one part of the product package they
 8 assert is misleading’”) (alterations in original); *Bobo v. Optimum Nutrition, Inc.*, No. 14CV2408,
 9 2015 WL 13102417, at *5 (S.D. Cal. Sept. 11, 2015) (“While a reasonable consumer may not
 10 inspect the finest of print to clarify a misleading statement, a reasonable consumer ... cannot look at
 11 only one statement to the exclusion of everything else and claim he has been misled.”); *Freeman v.*
 12 *Time, Inc.*, 68 F.3d 285, 289 (9th Cir. 1995) (plaintiff cannot claim to “review the large print and
 13 ignore the qualifying language in small print” when the “qualifying language appears immediately
 14 next to the representations it qualifies”); *Cheslow v. Ghiradelli Chocolate Co.*, 445 F. Supp. 3d 8,
 15 20 (N.D. Cal. 2020) (“Plaintiffs and the general consuming public are not free to ignore the
 16 ingredient list that does not include the words chocolate or cocoa. Accordingly, it is not plausible
 17 that [plaintiffs were] deceived by the product’s packaging.”).

18 For example, in *Ghiradelli*, plaintiff alleged “Premium White Baking Chips” were
 19 misleadingly labeled to imply that they were made of white chocolate because the packaging had a
 20 photo of cookies, used the terms “chips” and “premium,” and was sold in the baking aisle. The
 21 Court held that, absent any actual false statement on the label, it was implausible that plaintiff read
 22 the entire label except for the ingredient list, which did not include white chocolate or any of its
 23 component ingredients. 445 F. Supp. 3d at 20. Plaintiff’s claim here is even more implausible
 24 because the Nutrition Facts are the commonly known, and statutorily required, source of the
 25 information about saturated fat content, and the place where people who care would look, rather
 26 than selectively reading other parts of the labels, as Plaintiff claims to have done.

27 Plaintiff’s claim is separately implausible because nothing in the language she allegedly read
 28 and relied on discusses saturated fat at all. Why, for example, would reading “good source of fiber”

1 cause Plaintiff to form a belief about the saturated fat content? Nor does Plaintiff explain how many
 2 grams per serving of saturated fat she supposedly thought the product had as a result of reading the
 3 language in question, or why that would be so.

4 Nor can Plaintiff claim that she was somehow misled into believing that the product was
 5 healthier than it was. To the extent that Plaintiff actually cared how much saturated fat was in her
 6 snack foods, she was free to read the Nutrition Facts and decide whether the listed amount was what
 7 she wanted. That is the whole purpose of the Nutrition Facts panel; it tells consumers about the
 8 nutritional content, so that they can make their own informed choices. After providing the
 9 information required by the FDA, LesserEvil is under no legal obligation to tell people about how
 10 much saturated fat should be in a snack food, nor guess at whatever vague, protean standards
 11 Plaintiff's lawyers may seek to impose on any given day.²

12 For each of these reasons alone, and especially together, Plaintiff's claims are implausible.

13 **B. Plaintiff Does Not Allege That Any Statement on the Label Is False**

14 Plaintiff's claims are implausible for the separate and independent reason that Plaintiff does
 15 not allege that any of the statements that supposedly caused her to buy the snacks is untrue. The
 16 statements at issue fall into two categories. The first category, "40% Less Fat," "33% More Fiber,"
 17 and "20% Fewer Calories," explains that this comparison is made to "typical oil popped popcorn
 18 containing 10G fat, 3G fiber, and 150 calories per serving." (Compl. ¶ 5.) Looking at the Nutrition
 19 Facts (Compl. ¶ 25) confirms that these statements are true, and Plaintiff nowhere alleges otherwise.
 20 The second category, "healthier" and "Nutrient Dense" are not factual statements; they are classic
 21 puffery—claims that are not actionable because they cannot be objectively verified. Further,
 22 Plaintiff's claims separately fail because she does not explain what she thought the terms at issue
 23 meant or how what she received supposedly fell short.

24 ///

25 ///

26 _____
 27 ² This is especially true given that ideas about fat have changed over time. *See, e.g.*, "Ending the War on
 28 Fat," *Time Magazine* (June 12, 2014), available at <https://time.com/2863227/ending-the-war-on-fat/>; Nina
 Teicholz, "America's Changing Attitudes on Fat Consumption" (Oct. 18, 2018), available at
<https://ninateicholz.com/fat-consumption-american-changing-attitudes/>.

1. Plaintiff Does Not Allege That Any Factual Statement Is Untrue

Plaintiff claims that the language “40% Less Fat,” “33% More Fiber,” and “20% Fewer Calories,” caused her to buy the accused popcorn. (Compl. ¶¶ 17-18.) Each of the icons bearing this information contains an asterisk, which explains that this comparison is made to “typical oil popped popcorn containing 10G fat, 3G fiber, and 150 calories per serving.” (Compl. ¶ 5.) Plaintiff does not allege that any of these statements is untrue. The truth of these statement is also apparent on the face of the pleadings, as seen in the Nutrition Facts. (Compl. ¶ 25.) To the extent that Plaintiff claims that she did not read the information next to the asterisk, these statements would be puffery for the reasons given below—absent a comparator, none of these statements can be objectively verified. For similar reasons, the phrase “good source of fiber,” to the extent that there is a scientific standard or definition, is also true.³

The Complaint also does not allege that the terms “Good Source of Fiber,” and “Nutrient Dense” are untrue. For the reasons discussed below, it would be impossible to claim that these statements—which regularly appear in literature about popcorn—are untrue because they are not really capable of objective measurement. Regardless, Plaintiff cannot base a false advertising case on the statements “40% Less Fat,” “33% More Fiber,” “20% Fewer Calories,” “Good Source of Fiber,” and “Nutrient Dense” because she does not allege that they are in any way untrue.

2. The Terms “Healthier” and “Nutrient Dense” Are Puffery

A company may not be sued for making unproveable or subjective claims. “Generalized, vague, and unspecified assertions constitute ‘mere puffery’ ..., and hence are not actionable. To be actionable, a statement must be a “specific and measurable claim, capable of being proved false or of being reasonably interpreted as a statement of objective fact.” *Vitt v. Apple Computer, Inc.*, No. CV 06-7152-GW (FMOx) 2010 WL 11545683, at *3 (C.D. Cal. May 10, 2010), *aff’d* 469 Fed.Appx. 605 (9th Cir. 2012) (quoting *Coastal Abstract Serv., Inc. v. First Am. Title Ins. Co.*, 173

³ See, e.g., “How Much Fiber Is in Popcorn,” SF Gate (Dec. 2, 2018) (“Popcorn is not only a low-cal snack, but it’s also a good source of fiber.”), available at <https://healthyeating.sfgate.com/much-fiber-popcorn-6094.html>; “Health Benefits of Popcorn,” WebMD (Sept. 14, 2022) (“In addition to being high in fiber, popcorn also contains phenolic acids, a type of antioxidant. In addition, popcorn is a whole grain, an important food group that may reduce the risk of diabetes, heart disease, and hypertension in humans.”), available at <https://www.webmd.com/food-recipes/health-benefits-popcorn>.

1 F.3d 725, 731 (9th Cir. 1999)) (internal citation omitted); *see also Southland Sod Farms v. Stover*
 2 *Seed Co.*, 108 F.3d 1134, 1145 (9th Cir. 1997) (in contrast to “misdescriptions of specific or
 3 absolute characteristics of a product,” puffery consists of “product superiority claims that are vague
 4 or highly subjective”); *Newcal Indus., Inc. v. Ikon Office Solution*, 513 F.3d 1038, 1053 (9th Cir.
 5 2008) (“a general, subjective claim about a product is non-actionable puffery”) (quotation omitted).

6 The statements “Nutrient Dense” and “healthier” are puffery because they cannot be proven
 7 one way or another for at least two reasons. First, none of these statements have comparators, so
 8 there is nothing against which to objectively measure them. To assess if a food is healthier, one
 9 would need to know what it is being compared to, say a banana or a cheeseburger. The label does
 10 not compare the healthiness of snack foods, fiber content, or nutrient density to anything, which
 11 makes these claims puffery as a matter of law. *See Cook, Perkiss & Liehe, Inc. v. N. Cal. Collection*
 12 *Serv., Inc.*, 911 F.2d 242, 246 (9th Cir.1990) (“[A]dvertising which merely states in general terms
 13 that one product is superior is not actionable”) (quotation marks omitted); *Edmunson v. Procter &*
 14 *Gamble Co.*, 537 F. App’x 708, 709 (9th Cir. 2013) (to be actionable “a claim must be sufficiently
 15 specific, either by reference to particular product characteristics or ‘criteria for measuring a “better”
 16 shave,’ such that the claim can be tested”).

17 Plaintiff asserts that LesserEvil “claims that it is ‘healthier’ than competitors on its Product.”
 18 (Compl. ¶ 4.) This statement is inaccurate.⁴ The labels make no mention of any competitor. What
 19 the labels actually say (on the back, in a general description about the company) is that LesserEvil is
 20 “Making healthier, less processed, earth-friendly snacking accessible to everyone.” (*Id.*)

21 Second, there is no objective way to measure such a claim, even where, unlike here, the
 22 comparators are known. Nutrient density has no scientific meaning or measuring stick; the label
 23 does not even explain which nutrients are at issue or how density is measured.⁵ As for the term

24 ⁴ Pursuant to the Court’s Standing Order at Dkt. 3-1, on April 6, 2023, LesserEvil met and conferred with
 25 Plaintiff, and requested Plaintiff correct this inaccurate factual assertion so that the Court would not rely
 26 upon it, and to fix the other pleading deficiencies discussed in this brief. (Declaration of David H.
 Kwasniewski (“Kwasniewski Decl.”), Ex. 1.) Plaintiff declined to do so. (*Id.* ¶11.)

27 ⁵ Plaintiff does not claim that this statement is false either, as popcorn is considered nutrient-dense. *See, e.g.,*
 28 Von Nguyen, et al, “Popcorn Is More Satiating Than Potato Chips in Normal-Weight Adults,” National
 Library of Medicine, Nutr. J. 11:71 (2012) (“The satiety attribute, combined with popcorn’s other favorable

1 “healthier,” there is no objective measurement for this either, given the infinite ways healthiness
 2 might be assessed. For example, is an organic steak of grass-fed beef healthier than chips made
 3 from GMO corn?

4 Even in terms of fats and carbs, there is no right answer. Is a slice of whole-wheat bread
 5 healthier than a pat of butter? If you subscribe to a ketogenic diet, the answer is “no.” *See, e.g.,*
 6 “The Ultimate Keto Diet Food List (Plus, What to Avoid),” *Good Housekeeping* (Nov. 1, 2022)⁶
 7 (recommending “Most fats and oils: Eggs, butter, coconut oil, olive oil, ghee, lard, avocado oil (and
 8 avocados!), mayonnaise; High-fat dairy: Heavy cream, soft and hard cheeses, cream cheese, and
 9 sour cream” and listing “Starches: Bread (all of it!),” under “What You Can’t Eat”). The Pritikin
 10 Institute says otherwise. *See, e.g.,* [https://www.pritikin.com/your-health/health-benefits/healthy-](https://www.pritikin.com/your-health/health-benefits/healthy-weight-loss/537-trim-your-belly-fat-hip-fat-a-butt-fat.html)
 11 [weight-loss/537-trim-your-belly-fat-hip-fat-a-butt-fat.html](https://www.pritikin.com/your-health/health-benefits/healthy-weight-loss/537-trim-your-belly-fat-hip-fat-a-butt-fat.html) (“The experts agree. Moderate exercise
 12 and an eating plan that is low in fat and high in fiber-rich carbohydrates is the key to trimming body
 13 fat.”) (citing Archives of Internal Medicine, 2004; 164: 210). Still others differ. *See, e.g.,* Qing
 14 Yang, Xinyue Lang, Wei Li & Yan Liang, “The Effects of Low-Fat, High-Carbohydrate Diets vs.
 15 Low-Carbohydrate, High-Fat Diets on Weight, Blood Pressure, Serum Lipids and Blood Glucose:
 16 a Systematic Review and Meta-Analysis,” *European Journal of Clinical Nutrition* (June 24, 2021),
 17 available at <https://pubmed.ncbi.nlm.nih.gov/34168293/> (concluding that both high- and low-fat
 18 diets “are effective for weight control and reduction of cardiovascular risk factors” and “Between
 19 the two groups, changes in lean mass, fat mass, systolic blood pressure, diastolic blood pressure,
 20 triglycerides, and glucose were non-significant.”).⁷

21 Statements like “good” and “healthier” are puffery because there is no objective criteria for
 22 evaluating them. Without a comparator, objective standard or testing methodology, what is “good”

23 _____
 24 characteristics of being a whole grain, high fiber, nutrient dense snack, support popcorn as beneficial snack
 25 choice in the context of healthy weight management.”), available at
 26 <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3502142/>.

27 ⁶ available at [https://www.goodhousekeeping.com/health/diet-nutrition/a19660747/list-of-keto-diet-](https://www.goodhousekeeping.com/health/diet-nutrition/a19660747/list-of-keto-diet-foods/?utm_source=google&utm_medium=cpc&utm_campaign=arb_ga_gkh_md_dsa_prog_org_usx_a19660747&gclid=EAIaIQobChMI-uvlt8Gk_gIVOQGtBh3Vxw5gEAAAYAiAAEgI_1_D_BwE)
 28 [foods/?utm_source=google&utm_medium=cpc&utm_campaign=arb_ga_gkh_md_dsa_prog_org_usx_a19660747&gclid=EAIaIQobChMI-uvlt8Gk_gIVOQGtBh3Vxw5gEAAAYAiAAEgI_1_D_BwE](https://www.goodhousekeeping.com/health/diet-nutrition/a19660747/list-of-keto-diet-foods/?utm_source=google&utm_medium=cpc&utm_campaign=arb_ga_gkh_md_dsa_prog_org_usx_a19660747&gclid=EAIaIQobChMI-uvlt8Gk_gIVOQGtBh3Vxw5gEAAAYAiAAEgI_1_D_BwE).

⁷ Many other factors may also come into play regarding the healthiness of a food. *See, e.g.,* Harvard Medical School, “Ask the doctor: Why is peanut butter ‘healthy’ if it has saturated fat?” (July 30, 2019), available at
<https://www.health.harvard.edu/nutrition/ask-the-doctor-why-is-peanut-butter-healthy-if-it-has-saturated-fat>.

1 is purely subjective. *See, e.g., Fraker v. KFC Corp.*, No. 06-CV-01284-JM (WMC), 2007 WL
 2 1296571, at *3 (S.D. Cal. April 30, 2007) (“highest quality ingredients” was non-actionable
 3 puffery); *Tylka v. Gerber Prods. Co.*, No. 96 C 1647, 1999 WL 495126, at *8-9 (N.D. Ill. July 1,
 4 1999) (“optimum nutrition” and “most wholesome nutritious safe foods” were mere puffery because
 5 “nutrition is such a nebulous concept”); *Lloyd v. CVB Fin. Corp.*, 811 F.3d 1200, 1206-07 (9th Cir.
 6 2016) (affirming Rule 12(b)(6) dismissal of claim that “‘CVB’s credit metrics are superior’ to those
 7 of its peers” because credit metrics is not sufficiently concrete).

8 Even cases where companies make vague claims of superiority over their competitors’
 9 products—which are far more concrete than simply saying something is a “good source”—are
 10 regularly dismissed as puffery. Before she was elevated to the Ninth Circuit, Judge Koh reiterated
 11 this principle in *Yetter v. Ford Motor Co.*, where she dismissed as puffery the claim that a truck had
 12 “superior gas mileage and performance to previous Ford models”:

13 [T]he salesperson represented that the ‘2008 F-350 is a better truck
 14 with better performance; guaranteed’” and that “the 2008 F-350 had
 15 superior gas mileage and performance to previous Ford models.” *Id.*
 These statements are quintessential, non-actionable puffery.

16 No. 19-CV-00877-LHK, 2019 WL 7020348, at *18 (N.D. Cal. Dec. 20, 2019). These statements
 17 discuss product traits and make a comparison to other products. But they are “quintessential, non-
 18 actionable puffery,” because the concepts of “superior gas mileage,” and “better performing,” are
 19 typical vague, positive claims companies make about their products. If anything, those statements
 20 are more concrete than “good source of fiber” or “healthier.”

21 In *Oestreicher v. Alienware Corp.*, the Court dismissed as puffery the following claims
 22 about a computer: “faster, more powerful, and more innovative than competing machines,” “higher
 23 performance,” “longer battery life,” “richer multimedia experience,” “faster access to data” and
 24 “ensure optimum performance.” 544 F. Supp. 2d 964, 973 (N.D. Cal. 2008). These statements
 25 involve measurable computer attributes, *e.g.*, processor speed, and at least one of them makes this
 26 claim vis-à-vis “competing machines.” These statements, along with statements with no comparator
 27 such as “longer battery life” were all dismissed as puffery. The underlying reasoning—that such
 28 claims defy reasonable measurement—applies with equal or greater force to the terms at issue here,

such as “healthier,” “nutrient dense,” or “good source of fiber,” which similarly have no comparators and cannot be objectively verified. Her decision was affirmed by the Ninth Circuit. *Oestreicher v. Alienware Corp.*, 322 Fed. App’x 489, 493 (9th Cir. 2009).

In *Finney v. Ford Motor Co.*, Judge Tigar held that the language “longest lasting diesel motor” and “the longest lasting diesel in its class” were puffery. No. 17-cv-06183-JST, 2018 WL 2552266, at *8 (N.D. Cal. June 4, 2018). Again, defendant compared its products’ durability against other engines. Yet the claims were dismissed because they are simply vague proclamations that the product is good that are difficult to quantify or otherwise assay.

More cases than can be cited in this brief have applied these principles in less compelling circumstances than exist here. *See, e.g., Shaker v. Nature's Path Foods, Inc.*, No. EDCV 13-1138-GW(OPx), 2013 WL 6729802 (C.D. Cal. Dec. 16, 2013) (“Optimum” on cereal package is puffery); *In re Boston Beer Co.*, 198 F.3d 1370, 1372 (Fed. Cir. 1999) (“The Best Beer in America” is puffery); *Apodaca v. Whirlpool Corp.*, No. SACV 13-00725 JVS (ANx), 2013 WL 6477821, at *6 (C.D. Cal. Nov. 8, 2013) (“statements about dependability and superiority,” including comments such as “unequaled tradition of quality production” or “unrivaled performance” are “too vague to be actionable”); *Atari Corp. v. 3D0 Co.*, No. C 94-20298 RMW (EAI), 1994 WL 723601, at *2 (N.D. Cal. 1994) (“the most advanced home gaming system in the universe” was nonactionable puffery); *Nikkal Indus., Ltd. v. Salton, Inc.*, 735 F. Supp. 1227, 1234 n.3 (S.D.N.Y. 1990) (claim that ice cream maker was “better” than competition is puffery); *Greater Houston Transp. Co. v. Uber Techs., Inc.*, 155 F. Supp. 3d 670, 683 (S.D. Tex. 2015) (“the strictest safety standards possible” was puffery); *Guidance Endodontics, LLC v. Dentsply Intern., Inc.*, 708 F. Supp. 2d 1209, 1241 (D.N.M. 2010) (“world's best” dental equipment and “best in the world” were puffery; “Whether one thing of another is the ‘best’ is a normative assessment that involves weighing potentially infinite and sometimes immeasurable factors.”); *Inspired By Design, LLC v. Sammy's Sew Shop, LLC*, No. 16-CV-2290-DDC-KGG, 2016 WL 6093778 (D. Kan. Oct. 19, 2016) (defendants’ statements regarding the “high quality” of their pet beds were subjective and constituted mere puffery); *Sustainable Sourcing, LLC v. Brandstorm, Inc.*, No. 12-cv-30093-MAP, 2016 WL 3064055 (D. Mass. May 31, 2016) (“the purest salt on earth” was mere puffery and not a

1 “technically verifiable” claim); *Cytec Corp. v. Neuromedical Sys., Inc.*, 12 F. Supp. 2d 296, 304-05
 2 (S.D.N.Y. 1998) (“the ThinPrep system offers a ‘superior method of slide preparation that produces
 3 improved diagnostic quality, resulting in better patient outcome’” is puffery).

4 Plaintiff’s claims thus fail for the separate and independent reason that they are predicated
 5 on non-actionable puffery.

6 **3. Plaintiff Does Not Allege What She Thought Any of the Statements at** 7 **Issue Meant to Her**

8 Even if the statements Plaintiff relies on were not puffery, Plaintiff does not plausibly allege
 9 how those statements could have possibly misled her. To establish a claim under the statutes at issue
 10 (and to establish injury and causation, as required by Article III), a plaintiff must prove that she was
 11 misled. This requires alleging what the plaintiff thought she was being promised, and how what she
 12 received was something less. *See, e.g., Pelayo v. Nestle USA, Inc.*, 989 F. Supp. 2d 973, 978 (C.D.
 13 Cal. 2013) (plaintiff “cannot state a claim under the CLRA or UCL regarding Defendants’ allegedly
 14 false, misleading, and deceptive ‘All Natural’ labeling because she fails to offer an objective or
 15 plausible definition of the phrase ‘All Natural,’ and the use of the term ‘All Natural’ is not
 16 deceptive in context.”). Similarly here, Plaintiff does not offer any plausible allegation as to what
 17 she thought any of the above statements meant to her at the time of her purchases, or how what she
 18 bought failed to adhere to her definition.

19 **C. Plaintiff’s Efforts to Aggregate a Bunch of Truthful Statements into a** 20 **Supposedly Misleading One Fail as a Matter of Law**

21 Because Plaintiff cannot identify any false statements on the product labels, she asserts that
 22 the confluence of the puffery and truthful statements on the label somehow caused her to believe
 23 that the snacks she bought were healthier than they actually were. (Compl. ¶ 18.) A plaintiff,
 24 however, cannot transmute these non-actionable statements into a claim that she was supposedly
 25 misled when all the ingredients and nutritional facts were truthfully disclosed to her. Under these
 26 circumstances, a consumer may choose for herself what she thinks is healthy and suits her
 27 nutritional needs. *See, e.g., Clark v. Perfect Bar, LLC*, No. C 18-06006 WHA, 2018 WL 7048788,
 28 at *1 (N.D. Cal. Dec. 21, 2018), *aff’d*, 816 F. App’x 141 (9th Cir. 2020); *Truxel v. General Mills*
Sales, Inc., No. C 16-04957 JSW, 2019 WL 3940956, at *4 (N.D. Cal. Aug. 13, 2019); *Silver v. BA*

1 *Sports Nutrition, LLC*, No. 20-cv-00633-SI, 2020 WL 2992873, at *7 (N.D. Cal. June 4, 2020).
 2 Courts have rejected such theories because they would create a rule that would leave businesses
 3 exposed to sweeping claims with no legal standard.

4 In *Perfect Bar*, plaintiffs claimed that the label “led them to believe that the bars would be
 5 ‘healthy’ when, in supposed point of fact, the added sugar rendered them unhealthy or, in the
 6 alternative, less healthy from what they otherwise had believed.” 2018 WL 7048788, at *1. In
 7 dismissing these claims at the pleading stage, the Court reasoned that plaintiffs could simply look at
 8 the ingredients to “decide for themselves how healthy or not the sugar content would be” and that
 9 they could not have “reasonably overestimate[d] the health benefits of the bar merely because the
 10 packaging elsewhere refers to it as a health bar.” *Id.* Because “the honey/sugar content was properly
 11 disclosed—that is the end of it—period.” *Id.*

12 The same is true here. Like *Perfect Bar*, *LesserEvil* accurately discloses the saturated fat
 13 content in the Nutrition Facts. Plaintiff was free to “decide for [herself] how healthy or not the
 14 [saturated fat] content would be” and could not overestimate the healthiness of the snack. *Id.*

15 In *Truxel*, plaintiffs allegedly “read and decided to purchase the products in substantial part
 16 based on General Mill’s health and wellness labeling statements ... [making] the products seem like
 17 healthy food choices,” when in fact, they contained high levels of sugar, and that plaintiffs “would
 18 not have purchased the products if they had known that they were not as healthy as represented.”
 19 2019 WL 3940956, at *1.⁸ The Court dismissed these claims as a matter of law because “the actual
 20 ingredients were fully disclosed and it was up to the Plaintiffs, as reasonable consumers, to come to
 21 their own conclusions about whether or not the sugar content was healthy for them.” *Id.* at *4. The
 22 Court’s reasoning applies with equal force here: the ingredients and nutrition content were truthfully
 23 disclosed, and it was therefore up to Plaintiff “to come to [her] own conclusions about whether or
 24 not the [fat content] was healthy.” *Id.*

25 Many other decisions support this result. *See Yoshida v. Campbell Soup Co.*, No. 3:21-cv-
 26 09458, 2022 WL 1819528, at *1 (N.D. Cal. May 27, 2022) (“No reasonable consumer would be

27 _____
 28 ⁸ The Court had previously dismissed claims based on the language “nutritious, long-lasting energy,” “great start” and “world of goodness” as puffery. *Id.* at *2.

misled by the challenged phrases because the actual sugar content is plainly stated on the labels...Consequently, a reasonable consumer would have all the information he or she needed to decide whether the juices are a net benefit or detriment to personal health”); *Ghiradelli*, 445 F. Supp. 3d at 20 (“where the actual ingredients are disclosed, a plaintiff may not ignore the ingredient list”); *Ebner v. Fresh, Inc.*, 838 F.3d 958, 966 (9th Cir. 2016) (it is implausible to be misled about amount of product in lipstick tube when net weight was properly disclosed); *Silver v. BA Sports Nutrition*, 2020 WL 2992873, at *7 (N.D. Cal. June 4, 2020) (dismissing claims that sports beverage could mislead consumers about healthiness because sugar content was accurately stated in Nutrition Facts); *Horti v. Nestle HealthCare Nutrition, Inc.*, No. 21-cv-09812-PJH, 2022 WL 2441560, at *7 (N.D. Cal. July 5, 2022) (dismissing claims because “Plaintiffs do not contest that the product labels misstate the contents, that they misrepresent the ingredients, sugar, or carbohydrates.”).

The reasoning behind these decisions also applies with equal force here. Allowing this type of claim would subject companies to non-statutory labeling requirements that change based on what any given lawyer claims to be healthy, when different people have different needs (e.g., low sodium for heart patients vs. high sodium for athletes), and views about what is “healthy” differ and change. Even where, as here, a company truthfully and lawfully labels its products, it would be subject to expensive lawsuits, and the courts would be deluged with a never-ending stream of litigation.

II. LESSEREVIL HAS NOT BREACHED ANY TECHNICAL FDA LABELING RULE

Under the “unlawful” prong of the UCL, Plaintiff asserts that LesserEvil failed to adhere to technical FDA labeling regulations regarding nutrient content claims. (Compl ¶¶ 58-87.) This argument is incorrect. As discussed above, most of the statements on LesserEvil’s packaging are puffery and do not “expressly or implicitly characterize[] the level of a nutrient” and thus are not subject to FDA regulations. *Butts v. Cibo Vita, Inc.*, No. 2:22-cv-00644-DAD-KJN, 2023 WL 2588012, at *4 (E.D. Cal. Mar. 20, 2023) To the extent any statement on the label were more than puffery, the FDA expressly permits nutrient content claims without any additional disclosures where, as here, they appear on “the panel that bears the nutrition information.” 21 C.F.R. § 101.13(h)(4)(ii).

A. The Terms “Healthier,” “Good Source of Fiber,” and “Nutrient Dense” Are Not Nutrient Content Claims

The various puffery-type statements on LesserEvil’s labels are not nutrient content claims because they do not “expressly or implicitly characterize[] the level of a nutrient,” *Butts*, 2023 WL 2588012—indeed, as set forth above in Section I(B)(1), they do not characterize anything at all.

Plaintiff contends “healthier” is a specifically regulated term that may not appear on any product that contains more than 3 grams of saturated fat. (Compl. ¶ 72.) But the regulation cited, 21 C.F.R. § 101.65(d), only applies when the term “healthier” is used to “[s]uggest that a food because of its nutrient content may help consumers maintain healthy dietary practice” ***and*** is used “in connection with an explicit or implicit claim or statement *about a nutrient* (e.g., “healthy, contains 3 grams of fat”).” § 101.65(d)(1)(i)-(ii). LesserEvil makes no such claim. Rather, its packaging states: “healthier, less processed, earth-friendly snacking accessible to everyone.” (Compl. ¶ 25.) This romance language refers to no nutrients, dietary practices, or even popcorn. Merely using the word “healthier,” alone, is not sufficient to trigger application of the regulation. *Vitosus v. Alani Nutrition, LLC*, No. 21-cv-2048-MMA (MDD) 2022 WL 2441303, *4 (S.D. Cal. July 5, 2022) (assuming “fit” was a synonym of healthy, claim for violation of § 101.65(d) failed because “Plaintiffs do not plead that the word alone makes any ‘explicit or implicit claim or statement about a nutrient’”).

B. LesserEvil Complies with 21 C.F.R. § 101.13(h)

Plaintiff asserts that the other statements on LesserEvil’s packaging— “40% Less Fat,” “33% More Fiber,” and “20% Fewer Calories”—are impermissible nutrient content claims because they are not accompanied by the phrase “See nutrition information for _ content.” (Compl. ¶72.) It is true that 21 C.F.R. § 101.13(h)(1) requires such a disclosure when products exceed certain levels of fat, saturated fat, cholesterol, or sodium per serving. However, where the claim is on the same panel as the nutrition information, no disclosure is required. 21. C.F.R. § 101.13(h)(4)(ii) (“If the nutrient content claim appears on more than one panel of the label, the disclosure statement shall be adjacent to the claim on each panel ***except for the panel that bears the nutrition information where it may be omitted.***” (emphasis added).) Thus, like anyone with common sense, the FDA also understands that consumers reading the back panel will not skip over the nutrition information.

III. PLAINTIFF’S CLAIMS ARE PREEMPTED

Plaintiff’s claims fail for the separate and independent reason that her attempt to impose new requirements governing health claims are preempted by federal law. In 1990, Congress passed the Nutritional Labeling and Education Act (NLEA), which amended the Food Drug and Cosmetics Act (FDCA). *Clark v. Perfect Bar, LLC*, 816 F. App’x 141, 143 (9th Cir. 2020) (“The NLEA amended the FDCA to establish uniform food labeling requirements” (internal quotation marks omitted). The NLEA contains an express preemption provision, which “preempts all state law claims that directly or indirectly establish any requirement for the labeling of food that is not identical to the federal requirements.” *Id.* (internal quotation marks omitted).

Because FDA regulations—which LesserEvil complies with—describe the universe of health and nutrient content claims, Plaintiff’s proposed rule, which seeks to prohibit claims allowed by the FDA, is thus preempted. *See Effinger v. Ancient Organics LLC*, No. 22-cv-03596-RS, 2023 WL 2214168, at *4 (N.D. Cal. Feb. 24, 2023). In *Clark v. Perfect Bar, LLC*, 816 F. App’x 141, 143 (9th Cir. 2020), the Ninth Circuit addressed this exact issue, where plaintiffs claimed that the label implied that the product was “healthy” when it contained “too much” sugar. The Court upheld the dismissal of the claims, explaining that: “The NLEA preempts all state law claims that ‘directly or indirectly establish any requirement for the labeling of food that is not identical to the federal requirements’” *id.* (quoting *Hawkins v. Kroger Co.*, 906 F.3d 763, 769 (9th Cir. 2018)), and holding that: “To the extent Appellants’ claims advance the notion that Perfect Bar made an improper health claim due to added sugar levels in the bar, those claims are not viable.” *Id.*

The FDA has established detailed labeling requirements for use of terms like “healthier” on a food package. “Health claim means any claim made on the label or in labeling of a food, including a dietary supplement, that expressly or by implication ... characterizes the relationship of any substance to a disease or health-related condition.” 21 C.F.R. § 101.14(a)(1).

Here, as in *Perfect Bar*, Plaintiff’s claim that the phrases “healthier,” “Good Source of Fiber,” “40% Less Fat,” “33% More Fiber,” “20% Fewer Calories,” and “Nutrient Dense” on LesserEvil’s labels misled consumers about the health benefits of the popcorn is also an attempt to impose a new health claim rule. Moreover, as detailed above, LesserEvil complies with the FDA

regulations on nutrient content claims. Plaintiff nonetheless seeks to prevent LesserEvil from using the term “healthier” in any context, even when it is *not* “made in connection with an explicit or implicit claim or statement *about a nutrient* (e.g., “healthy, contains 3 grams of fat”).” 21 C.F.R. § 101.65(d)(1)(i)-(ii). As such, Plaintiff’s “state law claims brought under the CLRA, FAL, and UCL” are preempted, and the Court should dismiss those claims. *Butts v. Cibo Vita, Inc.*, No. 2:22-cv-00644-DAD-KJN, 2023 WL 2588012, at *6 (E.D. Cal. Mar. 20, 2023); *Perfect Bar*, 816 F. App’x at 143; *Ackerman v. Coca Cola, Co.*, No. CV-09-0395 (JG)(RML), 2010 WL 2925955, at *3 (E.D.N.Y. 2010); *see also Chacanaca v. Quaker Oats Co.*, 752 F. Supp. 2d. 1111, 1122–23 (N.D. Cal. 2010) (Koh, J.) (rejecting attempt “to ascribe disqualifying status to trans fats where the [FDA] has at least so far declined to do so” and holding that claims were preempted).

IV. PLAINTIFF’S CLAIMS ARE BARRED BY THE FIRST AMENDMENT

Plaintiff’s claims are separately and independently barred by the First Amendment. Plaintiffs’ proposed state-law regulation punishing LesserEvil’s truthful speech violates the First Amendment. There is no governmental interest in preventing LesserEvil from making truthful statements on its labels or compelling it to disclose Plaintiff’s lawyers’ health theories. Nor is her regulation in any way tailored to achieving such interest; it is so nebulous that no business could comply with it, resulting in a substantial suppression of protected speech.

Plaintiff’s nebulous regulation seeks to prohibit admittedly truthful speech. Such a regulation can only be upheld if: (1) the government’s interest in regulating speech is substantial; (2) the restrictions directly advance the government’s asserted interest; and (3) the restrictions are no more extensive than necessary to serve that interest. *Central Hudson Gas & Elec. Corp. v. Pub. Service Comm’n of New York*, 447 U.S. 557, 566 (1980); *Sorrell v. IMS Health Inc.*, 564 U.S. 552, 578-79 (2011); *City of Austin v. Reagan Nat’l Advertising of Austin, LLC*, 142 S.Ct. 1464 (2022).

Here, the government has no interest in prohibiting LesserEvil from making truthful statements about its products, let alone a substantial interest. This is especially true given that the speech is allowed under FDA regulations. Nor is Plaintiffs’ proposed regulation tailored to achieve any interest beyond spinning out pointless litigation. Plaintiffs’ regulation has no limits. It would allow anyone to sue LesserEvil on any theory of what a “healthy” snack should, or should not, have

1 based on any daisy-chain of inferences. Could LesserEvil truthfully state it contains fiber without
 2 fear of suit for implying the product is “healthy?” Could LesserEvil truthfully explain how it is
 3 made with coconut oil without someone inferring that coconut products are “healthy”? Could
 4 LesserEvil’s put an image of a person playing a sport on its label if someone could say this implied
 5 “healthiness”? Plaintiffs’ amorphous rule would chill truthful speech and is the definition of
 6 overbreadth. Because the First Amendment protects against such incursions, Plaintiff’s claims
 7 should be dismissed for this separate and independent reason.

8 **V. PLAINTIFF’S ASSORTMENT OF OTHER CLAIMS FAILS**

9 Plaintiff asserts parasitic claims for “unjust enrichment” and the “Consumer Protection
 10 Statutes” of other states, which fail for all the reasons above. *See Weiss v. Trader Joe’s Co.*, No.
 11 8:18-cv-01130-JLS-GJS 2018 WL 6340758, at *8 (C.D. Cal. Nov. 20, 2018) (where false
 12 advertising claims concerning ionized water failed, tag-along unjust enrichment claim also failed);
 13 *see also Ebner v. Fresh, Inc.*, 838 F.3d 958, 968 (9th Cir. 2016) (unjust enrichment claim mooted
 14 where complaint failed to state a claim as to other causes of action).

15 Plaintiff’s claims for supposed violations of other state laws also fail because Plaintiff has
 16 not alleged that she has standing to assert various statutory claims under foreign state law. Plaintiff
 17 does not even identify the laws of the other states under which she claims she has a right to bring
 18 suit, much less explain how she, a resident of California, suffered an injury in another state. And an
 19 abstract interest in enforcing the laws of other states cannot suffice to confer standing on Plaintiff.
 20 *TransUnion LLC v. Ramirez*, 141 S. Ct. 2190, 2203 (2021) (“Under Article III, federal courts do not
 21 adjudicate hypothetical or abstract disputes...Federal courts do not exercise general legal oversight
 22 of the Legislative and Executive Branches, or of private entities. And federal courts do not issue
 23 advisory opinions.”).

24 **VI. PLAINTIFF LACKS STANDING TO SEEK INJUNCTIVE RELIEF**

25 To establish standing to seek injunctive relief, a plaintiff must demonstrate “a real and
 26 immediate threat of repeated injury” and that “the claimed threat of injury must be likely to be
 27 redressed by the prospective injunctive relief.” *Bates v. United Parcel Serv., Inc.*, 511 F.3d 974,
 28

1 985 (9th Cir. 2007). The “threat of injury must be actual and imminent, not conjectural or
 2 hypothetical.” *Davidson v. Kimberly–Clark Corp.*, 889 F.3d 956, 967 (9th Cir. 2018).

3 Plaintiff cannot establish such a threat, and her request for an injunction should therefore be
 4 dismissed for lack of standing. Plaintiff claims that she “would consider purchasing the Products in
 5 the future” if they “are properly labeled.” (Compl. ¶19.) Such a speculative intention to purchase the
 6 snacks in the future does not mean Plaintiff is likely to suffer future harm. *In re Coca-Cola Prods.*
 7 *Marketing & Sales Practices Litig.*, No. 20-15742, 2021 WL 3878654, at *2 (9th Cir. 2021)
 8 (Berzon, J.) (reversing district court’s determination that plaintiffs had standing because
 9 “declarations that they would ‘consider’ purchasing properly labeled Coke are insufficient to show
 10 an actual or imminent threat of future harm”); *see also Vitiosus v. Alani Nutrition, LLC*, No. 21-cv-
 11 2048-MMA (MDD), 2022 WL 2441303, at *7 (S.D. Cal. July 5, 2022) (“[I]n order to demonstrate
 12 standing to seek injunctive relief, Plaintiffs must plausibly allege that they will be deceived again”).
 13 Similarly, Plaintiff’s abstract interest in “properly labeled” products “is insufficient to demonstrate
 14 [she has] suffered any particularized adverse effects.” *In re Coca-Cola*, 2021 WL 3878654 at *2. To
 15 the extent Plaintiff is actually concerned about the level of saturated fat in her foods, she can simply
 16 read the label to determine whether the product meets her personal definition of healthiness. *See*
 17 *Cordes v. Boulder Brands USA, Inc.*, No. CV 18-6354 PSG (JCx) 2018 WL 6714323, at *4 (C.D.
 18 Cal. Oct. 17, 2018) (“now that Plaintiff is on notice about potential underfilling, he could easily
 19 determine the number of pretzels in each package before making a future purchase by simply
 20 reading the back panel, which lists the number of servings in each bag and the number of pretzels in
 21 each serving”).

22 CONCLUSION

23 For the foregoing reasons, the Complaint should be dismissed with prejudice.
